

For Research Use Only

HLA-DRB3 Polyclonal antibody

Catalog Number: 16789-1-AP

Basic Information

Catalog Number: 16789-1-AP	GenBank Accession Number: BC008987	Purification Method: Antigen affinity purification
Size: 150ul , Concentration: 400 µg/ml by Nanodrop;	GeneID (NCBI): 3125	Recommended Dilutions: WB 1:500-1:2000
Source: Rabbit	UNIPROT ID: P79483	
Isotype: IgG	Full Name: major histocompatibility complex, class II, DR beta 3	
Immunogen Catalog Number: AG10223	Calculated MW: 266 aa, 30 kDa	
	Observed MW: 28-30 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls: WB : Daudi cells, Raji cells, Ramos cells
Species Specificity: human	

Background Information

Human major histocompatibility complex (MHC) antigens, also referred to as human leukocyte antigens (HLA), are encoded by genes located on the short arm of chromosome 6 (6p21.3). There are two classes of HLA antigens: class I (HLA-A, B and C) and class II (HLA-D). The class II molecules are heterodimers consisting of an alpha (DRA) and a beta (DRB) chain. HLA-DRB3 is a beta chain of MHC class II molecule expressed on the surface of antigen presenting cells (APC) like B cells, macrophages, and dendritic cells (PMID: 30192820). It is involved in adaptive immune responses by presenting peptide antigens to CD4+ T cells (PMID: 19830726).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 16789-1-AP (HLA-DRB3 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.
