Caspase 1/p20/p10 Polyclonal antibody

Catalog Number:16804-1-AP

1 Publications

Basic Information	Catalog Number: 16804-1-AP	GenBank Accession Number: BC062327	Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 227 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI):	NCBI):	
		UNIPROT ID: P29466		
	Source: Rabbit Isotype: IgG	Full Name: caspase 1, apoptosis-related cystei	ne	
		peptidase (interleukin 1, beta, convertase)		
	Immunogen Catalog Number: AG10291	Calculated MW: 404 aa, 45 kDa		
Applications	Tested Applications: ELISA			
	Cited Applications: WB			
	Species Specificity: human			
	Cited Species: human			
Background Information	CASP1(caspase-1) is also named as IL1BC, IL1BCE and belongs to the peptidase C14A family. It is a cysteine protease that regulates inflammatory processes through its capacity to process and activate the interleukin-1-bet. (IL1B), IL18, and IL33 precursor proteins. The active caspase-1 can increase cellular membrane permeability and intracellular calcium levels, which facilitates lysosome exocytosis and release of host antimicrobial factors and microbial products(PMID:21804020). It has 5 isoforms produced by alternative splicing.			
	intracellular calcium levels, which fa	cilitates lysosome exocytosis and re	elease of host antimicrobial factors and	
	intracellular calcium levels, which fa microbial products(PMID:21804020).	cilitates lysosome exocytosis and re	elease of host antimicrobial factors and	
	intracellular calcium levels, which fa microbial products(PMID:21804020). Author Put	acilitates lysosome exocytosis and re It has 5 isoforms produced by altern	elease of host antimicrobial factors and ative splicing.	
Notable Publications	intracellular calcium levels, which fa microbial products(PMID:21804020). Author Put	acilitates lysosome exocytosis and re It has 5 isoforms produced by alterna omed ID Journal 051255 Life Sci Alliance eer shipment.	elease of host antimicrobial factors and ative splicing.
