

MEF2C-Specific Polyclonal antibody

Catalog Number: 18293-1-AP

Basic Information

Catalog Number: 18293-1-AP	GenBank Accession Number: NM_002397	Purification Method: Antigen affinity purification
Size: 150ul , Concentration: 213 µg/ml by Nanodrop and 213 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI): 4208	Recommended Dilutions: WB 1:500-1:1000 IHC 1:20-1:200
Source: Rabbit	Full Name: myocyte enhancer factor 2C	
Isotype: IgG	Calculated MW: 51 kDa	
	Observed MW: 45-70 kDa	

Applications

Tested Applications: IHC, WB, ELISA	Positive Controls: WB : SH-SY5Y cells,
Species Specificity: human, mouse, rat	IHC : human testis tissue, human brain tissue, human kidney tissue, human lung tissue, human spleen tissue
Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0	

Background Information

MEF2C belongs to the MEF2 family. It is a transcription activator which binds specifically to the MEF2 element present in the regulatory regions of many muscle-specific genes. MEF2C controls cardiac morphogenesis and myogenesis, and is also involved in vascular development. It plays an essential role in hippocampal-dependent learning and memory by suppressing the number of excitatory synapses and thus regulating basal and evoked synaptic transmission. It is crucial for normal neuronal development, distribution, and electrical activity in the neocortex and is necessary for proper development of megakaryocytes and platelets and for bone marrow B lymphopoiesis. This protein is required for B-cell survival and proliferation in response to BCR stimulation, efficient IgG1 antibody responses to T-cell-dependent antigens and for normal induction of germinal center B cells. It may also be involved in neurogenesis and in the development of cortical architecture. The immunogen used is peptide from the specific sequence of MEF2C transcript variant 1 match to transcript variant 5. The antibody can recognize the transcript variant 1, transcript variant 2 and transcript variant 3 of MEF2C.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

***** 20ul sizes contain 0.1% BSA**

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

SH-SY5Y cells were subjected to SDS PAGE followed by western blot with 18293-1-AP (MEF2C-Specific antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human testis using 18293-1-AP (MEF2C-Specific antibody) at dilution of 1:50 (under 10x lens).
