

For Research Use Only

MEF2A-Specific Polyclonal antibody

Catalog Number: 18709-1-AP

Basic Information

Catalog Number:	GenBank Accession Number:	Purification Method:
18709-1-AP	BC013437	Antigen affinity purification
Size:	GeneID (NCBI):	
150ul	4205	
Source:	Full Name:	
Rabbit	myocyte enhancer factor 2A	
Isotype:	Calculated MW:	
IgG	55 kDa	

Applications

Tested Applications:
ELISA

Species Specificity:
human, mouse, rat

Background Information

MEF2A belongs to a family of DNA binding regulatory proteins. Each of these proteins which belong to the myocyte-specific enhancer factor-2 (MEF2) family binds to the MEF2 target DNA sequence present in the regulatory regions of many, if not all, muscle-specific genes. MEF2A plays diverse roles in the control of cell growth, survival and apoptosis via p38 MAPK signaling in muscle-specific and/or growth factor-related transcription. MEF2A also has key roles in cardiac and skeletal muscle development. MEF2A is especially abundant in granule neurons of the cerebellar cortex throughout the period of synaptogenesis. The antibody recognized the isoform MEF2, isoform RSRFC4 and isoform 5 of MEF2A.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA
