

# PLA2R1 Polyclonal antibody

Catalog Number: 18798-1-AP

Featured Product

1 Publications

## Basic Information

## Catalog Number:

18798-1-AP

## Size:

150ul

## Source:

Rabbit

## Isotype:

IgG

## GenBank Accession Number:

BC144631

## GeneID (NCBI):

22925

## UNIPROT ID:

Q13018

## Full Name:

phospholipase A2 receptor 1, 180kDa

## Calculated MW:

168 kDa

## Purification Method:

Antigen affinity purification

## Applications

## Tested Applications:

ELISA

## Cited Applications:

WB

## Species Specificity:

human

## Cited Species:

human

## Background Information

Secretory phospholipase A2 (sPLA2) are implicated in a number of crucial physiological and pathological processes in mammals. Different types of membrane receptors for sPLA2s have been identified. The M-type receptor, PLA2R1 (phospholipase A2 receptor 1, 180 kDa), is a type I transmembrane glycoprotein containing extracellularly a cysteine-rich domain, a fibronectin type II domain and eight carbohydrate-recognition domains. It is a receptor for phospholipase sPLA2-IB/PLA2G1B but not sPLA2-IIA/PLA2G2A. It is also able to bind to snake PA2-like toxins. PLA2R1 may be involved in responses in proinflammatory cytokine productions during endotoxic shock. It also has endocytic properties and rapidly internalizes sPLA2 ligands, which is particularly important for the clearance of extracellular sPLA2s to protect their potent enzymatic activities. It has been recently shown that PLA2R1 is the major target antigen in idiopathic membranous nephropathy (iMN). Patients with iMN have antibodies against a conformation-dependent epitope in PLA2R1.

## Notable Publications

Author	Pubmed ID	Journal	Application
N D Quach	25189995	Mol Pharm	WB

## Storage

## Storage:

Store at -20°C. Stable for one year after shipment.

## Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

\*\*\* 20ul sizes contain 0.1% BSA
