For Research Use Only

PAX8-Specific Polyclonal antibody

Catalog Number: 19120-1-AP

Basic Information

Catalog Number:

GenBank Accession Number:

Purification Method: Antigen affinity purification

19120-1-AP

NM_013992 GeneID (NCBI):

150ul , Concentration: 107 µg/ml by 7849 Bradford method using BSA as the

standard;

UNIPROT ID: Q06710

Source:

Full Name:

Rabbit Isotype:

paired box 8 Calculated MW:

48 kDa

Applications

Tested Applications:

ELISA

Species Specificity:

human

Background Information

PAX8 is a member of the paired box (PAX) family of transcription factors, typically containing a paired box domain and a paired-type homeodomain. The specific function of the PAX8 is unknown but it may involve kidney cell differentiation, thyroid development, or thyroid dysgenesis. Several other splice variants have been proposed but the full nature of these products has not been described. Pax8 is also a marker of otic progenitor cells. Mutation of PAX8 will cause congenital hypothyroidism non-goitrous type 2 (CHNG2). This antibody is specific to Pax8. It will not cross react with other PAX members.

Storage

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data
