Background Information

UNC5A, also named as KIAA1976 and UNC5H1, belongs to the unc-5 family. It is a receptor for netrin required for axon guidance. It mediates axon repulsion of neuronal growth cones in the developing nervous system upon ligand binding. Axon repulsion in growth cones may be caused by its association with DCC that may trigger signaling for repulsion. It also acts as a dependence receptor required for apoptosis induction when not associated with netrin ligand. The antibody is specific to UNC5A. It has no cross reaction to UNC5B, UNC5C and UNC5D.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 20239-1-AP (UNC5A-Specific antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 20239-1-PBS in a different storage buffer formulation.
