For Research Use Only

NPT1 Polyclonal antibody Catalog Number:20751-1-AP 3 Publications

Basic Information	Catalog Number: 20751-1-AP	GenBank Accession Number: BC 101745	Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 500 ug/ml by Nanodrop and 300 ug/ml by Bradford method using BSA as the standard;	GenelD (NCBI):	Recommended Dilutions:	
		6568	WB 1:500-1:2000	
		UNIPROT ID: Q14916		
	Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG12819	Full Name: solute carrier family 17 (sodium		
		phosphate), member 1		
		Calculated MW: 467 aa, 51 kDa		
		Observed MW:		
		50 kDa, 60-64 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, ELISA	WB : mou	WB : mouse kidney tissue, human placenta tissue	
	Cited Applications: WB			
	Species Specificity: human, mouse, rat			
	Cited Species: human, mouse			
Background Informatior	human, mouse NPT1 (also known as SLC 17A 1) is a m regulates entrance into the cellular m anions such as PAH (para-aminohipp	nembrane. NPT1 is mainly express urate), but it is also found in the liv cells. NPT1 exits two isoforms due	ver and brain. NTP1 localizes to the apical to the alternative splicing. Western blot	
	human, mouse NPT1 (also known as SLC 17A 1) is a m regulates entrance into the cellular m anions such as PAH (para-aminohipp membrane of renal proximal tubular analysis using this antibody detected	nembrane. NPT1 is mainly express urate), but it is also found in the liv cells. NPT1 exits two isoforms due	ed in the kidney transporting small organic ver and brain. NTP1 localizes to the apical to the alternative splicing. Western blot	
	human, mouse NPT1 (also known as SLC17A1) is a m regulates entrance into the cellular m anions such as PAH (para-aminohipp membrane of renal proximal tubular analysis using this antibody detected Author Pubr	nembrane. NPT1 is mainly express urate), but it is also found in the liv cells. NPT1 exits two isoforms due a major band around 45-55 kDa in	ed in the kidney transporting small organic ver and brain. NTP1 localizes to the apical e to the alternative splicing. Western blot n kidney tissue.	
	human, mouse NPT1 (also known as SLC17A1) is a m regulates entrance into the cellular m anions such as PAH (para-aminohippi membrane of renal proximal tubular analysis using this antibody detected Author Pubr Ruixia Bao 3478	nembrane. NPT1 is mainly express urate), but it is also found in the liv cells. NPT1 exits two isoforms due a major band around 45-55 kDa in ned ID Journal	ed in the kidney transporting small organic ver and brain. NTP1 localizes to the apical e to the alternative splicing. For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

mouse kidney tissue were subjected to SDS PAGE followed by western blot with 20751-1-AP (NPT1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.
