Background Information

The choline transport system has been categorized into three transporter families: Polyspecific organic cation transporters (OCTs/SLC22A1-2) with low affinity for choline, high-affinity choline transporter 1 (CHT1/SLC5A7) and intermediate-affinity choline transporter-like proteins (CTLs/SLC44A1-5). The CTLs/SLC44A1-5 were shown to be present in various human tissues. SLC44A5, also known as CTL5, is an integral membrane protein. SLC44A5 is involved in the membrane-spanning transport of choline.
