

For Research Use Only

MIF4GD Polyclonal antibody, PBS Only

Catalog Number: 24288-1-PBS

Basic Information

Catalog Number: 24288-1-PBS	GenBank Accession Number: BC033759	Purification Method: Antigen affinity purification
Size: 100ug, Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 57409	
Source: Rabbit	UNIPROT ID: A9UHW6	
Isotype: IgG	Full Name: MIF4G domain containing	
Immunogen Catalog Number: AG17931	Calculated MW: 256 aa, 29 kDa	
	Observed MW: ~25 kDa	

Applications

Tested Applications:
WB, IHC, Indirect ELISA

Species Specificity:
human, mouse

Background Information

MIF4GD (MIF4G domain containing), also known as MIFD, AD023, or SLIP1, is a 222 amino acid protein that contains one MIF4G domain. Localized to both the nucleus and the cytoplasm, MIF4GD plays a role in the replication-dependent translation of histone mRNAs, which differ from most eukaryotic mRNAs in that they end with a stem-loop instead of a poly-A tail. Specifically, MIF4GD interacts with SLBP, eIF4G and DAP-5. Via its interaction with SLBP, MIF4GD is thought to be tethered to the stem loops of histone mRNAs where it may facilitate the circularizing of the mRNAs, thereby enhancing their translation. Depletion of MIF4GD results in reduced histone translation and may lead to cell death, suggesting that MIF4GD plays an important role in cell survival. Two isoforms of MIF4GD exist due to alternative splicing events.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

mouse testis tissue was subjected to SDS PAGE followed by western blot with 24288-1-AP (MIF4GD antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 24288-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded mouse testis tissue slide using 24288-1-AP (MIF4GD antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 24288-1-PBS in a different storage buffer formulation.
