

For Research Use Only

FXI Polyclonal antibody, PBS Only

Catalog Number: 24321-1-PBS

Basic Information

Catalog Number:

24321-1-PBS

Size:

100ug, Concentration: 1 mg/ml by Nanodrop;

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG18004

GenBank Accession Number:

BC119014

GeneID (NCBI):

2160

UNIPROT ID:

P03951

Full Name:

coagulation factor XI

Calculated MW:

625 aa, 70 kDa

Observed MW:

70 kDa

Purification Method:

Antigen affinity purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Factor XI (FXI) is the zymogen of a blood coagulation protease, factor XIa (FXIa), that contributes to hemostasis by activating factor IX. Factor XI is a precursor of an S1 serine protease found in blood plasma. When activated to FXIa, it plays a crucial role in forming and stabilizing fibrin by triggering the activation of factor IX (PMID: 38545505). FXI has 2 isoforms with the molecular mass of 70 kDa and 64 kDa. Isoform 2 is produced by platelets and megakaryocytes but absent from other blood cells.

Storage

Storage:

Store at -80°C.

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Rat liver tissue were subjected to SDS PAGE followed by western blot with 24321-1-AP (FXI antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 24321-1-PBS in a different storage buffer formulation.
