HPSE Polyclonal antibody Catalog Number:24529-1-AP 12 Publications

Basic Information	Catalog Number: 24529-1-AP	GenBank Accession Number: BC051321	Purification Method: Antigen affinity purification
	Size:	GeneID (NCBI):	Recommended Dilutions:
	150ul , Concentration: 750 ug/ml by	10855	WB 1:1000-1:8000
	Nanodrop and 360 ug/ml by Bradford	UNIPROT ID:	IHC 1:20-1:200
	method using BSA as the standard;	Q9Y251	IF/ICC 1:10-1:100
	Source:	Full Name:	
	Rabbit	heparanase	
	Isotype: IgG	Calculated MW:	
	Immunogen Catalog Number:	543 aa, 61 kDa	
	AG21479	Observed MW: 60 kDa	
Applications	Tested Applications:	Positive C	Controls:
	Cited Applications: tissue		cells, HepG2 cells, Jurkat cells, mouse liver
			an liver cancer tissue, human placenta tissu
	Species Specificity: human, mouse		leLa cells, HepG2 cells
	Cited Species: human, mouse, rat		
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0		
Background Information	family. It is a endoglycosidase that cl and core proteoglycans. HPSE is essen has 3 isoforms produced by alternativ length protein has six glycosylation s	eaves heparan sulfate proteoglyc ntial in the disassembly of the ext re splicing with the molecular wei ites. The cleavage of the 65 kDa fi cts. The active form, the 8/50 kDa	1 and belongs to the glycosyl hydrolase 79 ans (HSPGs) into heparan sulfate side chains racellular matrix (ECM) by invading cells. It ght of 61 kDa, 55 kDa and 53 kDa. The full orm leads to the generation of a linker heterodimer, is resistant to degradation and pility.
	family. It is a endoglycosidase that cl and core proteoglycans. HPSE is essen has 3 isoforms produced by alternativ length protein has six glycosylation s peptide, and 8 kDa and 50 kDa produc glycosylation of the 50 kDa subunit a	eaves heparan sulfate proteoglyc ntial in the disassembly of the ext re splicing with the molecular wei ites. The cleavage of the 65 kDa fi cts. The active form, the 8/50 kDa	ans (HSPGs) into heparan sulfate side chains racellular matrix (ECM) by invading cells. It ght of 61 kDa, 55 kDa and 53 kDa. The full orm leads to the generation of a linker heterodimer, is resistant to degradation and pility.
	family. It is a endoglycosidase that cl and core proteoglycans. HPSE is essen has 3 isoforms produced by alternative length protein has six glycosylation s peptide, and 8 kDa and 50 kDa produce glycosylation of the 50 kDa subunit a Author Pub	eaves heparan sulfate proteoglyc ntial in the disassembly of the ext re splicing with the molecular wei ites. The cleavage of the 65 kDa f cts. The active form, the 8/50 kDa l ppears to be essential for its solut med ID Journal	ans (HSPGs) into heparan sulfate side chains racellular matrix (ECM) by invading cells. It ght of 61 kDa, 55 kDa and 53 kDa. The full orm leads to the generation of a linker heterodimer, is resistant to degradation and

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 24529-1-AP (HPSE antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffinembedded human liver cancer slide using 24529-1-AP (HPSE Antibody) at dilution of 1:50.

Immunohistochemical analysis of paraffinembedded human liver cancer slide using 24529-1-AP (HPSE Antibody) at dilution of 1:50.

Immunohistochemical analysis of paraffinembedded human placenta tissue slide using 24529-1-AP (HPSE antibody) at dilution of 1:400 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of HeLa cells using 24529-1-AP (HPSE antibody) at dilution of 1:25 and Rhodamine-Goat anti-Rabbit IgG.
