## For Research Use Only

## APP/Beta Amyloid Polyclonal antibody

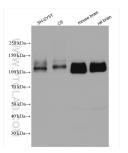

Catalog Number:25524-1-AP

Featured Product 98 Publications

	Catalog Number: 25524-1-AP	GenBank Accessior BC065529	Number:	Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 550 ug/ml by Nanodrop; Source:	UNIPROT ID: P05067 Full Name: amyloid beta (A4) precursor protein Observed MW:		Recommended Dilutions: WB 1:500-1:2000 IHC 1:50-1:500 IF/ICC 1:50-1:500	
	Rabbit Isotype: IgG Immunogen Catalog Number: AG22408				
Applications	Tested Applications: WB, IHC, IF/ICC, ELISA		Positive Controls: WB : SH-SY5Y cells, HAP1 cells, HeLa cells, NCI-H1299		
	Cited Applications: WB, IHC, IF		cells, mouse brain tissue, rat brain tissue, C6 cells IHC : human gliomas tissue, human brain tissue IF/ICC : SH-SY5Y cells,		
	Species Specificity: human, mouse, rat				
	Cited Species: human, mouse, rat, zebrafish				
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0				
Background Information	A $\beta$ derives from APP via proteolytic cleavage by proteases called $\alpha$ -, $\beta$ - and $\gamma$ -secretase. The $\alpha$ -secretase cleavage precludes the formation of A $\beta$ , while the $\beta$ - and $\gamma$ -cleavages generate APP components with amyloidogenic features. Amyloid beta A4 precursor protein(APP), encoded by APP gene which locate on human chromosome 21q, is a cell surface receptor and performs physiological functions on the surface of neurons relevant to neurite growth, neuronal adhesion and axonogenesis. APP expressed in all fetal tissues and is pronounced in brain, kidney, heart and spleen, but weak in liver. Defects in APP are the cause of Alzheimer disease type 1 (AD1). Amyloid $\beta$ (A $\beta$ ) precursor protein (APP) is a 100-140 kDa transmembrane glycoprotein that exists as several isoforms. This antibody can recognize several isoforms of both mature and immature amyloid beta (A4) precursor protein, including APP77C APP677, APP695, APP696, APP733, APP751, APP752, and APP639. APP can be cleaved into several chains, this antibody could recognize fragments C99, Amyloid-beta protein 42, Amyloid-beta protein 40, C83, P3(40), C80, Gamma-secretase C-terminal fragment 50, C31.				
	a cell surface receptor and performs neuronal adhesion and axonogenesi and spleen, but weak in liver. Defect precursor protein (APP) is a 100-140 can recognize several isoforms of bo APP677, APP695, APP696, APP733, A antibody could recognize fragments Gamma-secretase C-terminal fragm	protein(APP), encode physiological functic s. APP expressed in a s in APP are the caus kDa transmembrane th mature and imma PP751, APP752, and / C99, Amyloid-beta p	d by APP gene wh ons on the surface of all fetal tissues and e of Alzheimer dis glycoprotein that ture amyloid beta APP639. APP can b rotein 42, Amyloio	ich locate on human chromosome 21q, i of neurons relevant to neurite growth, d is pronounced in brain, kidney, heart ease type 1 (AD1). Amyloid $\beta$ (A $\beta$ ) exists as several isoforms. This antibody (A4) precursor protein, including APP77 e cleaved into several chains, this d-beta protein 40, C83, P3(40), C80,	
Notable Publications	a cell surface receptor and performs neuronal adhesion and axonogenesi and spleen, but weak in liver. Defect precursor protein (APP) is a 100-140 can recognize several isoforms of bo APP677, APP695, APP696, APP733, A antibody could recognize fragments Gamma-secretase C-terminal fragm terminal fragment 50, C31.	protein(APP), encode physiological functions. APP expressed in a sin APP are the cause kDa transmembrane th mature and immar- th mature and immar- th mature and immar- th mature and immar- pr751, APP752, and / C99, Amyloid-beta p ent 59, Gamma-secre	d by APP gene wh ons on the surface of all fetal tissues and e of Alzheimer dis glycoprotein that ture amyloid beta APP639. APP can b rotein 42, Amyloio	ich locate on human chromosome 21q, i of neurons relevant to neurite growth, d is pronounced in brain, kidney, heart ease type 1 (AD1). Amyloid $\beta$ (A $\beta$ ) exists as several isoforms. This antibody (A4) precursor protein, including APP77 e cleaved into several chains, this d-beta protein 40, C83, P3(40), C80,	
Notable Publications	a cell surface receptor and performs neuronal adhesion and axonogenesi and spleen, but weak in liver. Defect precursor protein (APP) is a 100-140 can recognize several isoforms of bo APP677, APP695, APP696, APP733, A antibody could recognize fragments Gamma-secretase C-terminal fragm terminal fragment 50, C31.	protein(APP), encode physiological functions. APP expressed in a sin APP are the cause kDa transmembrane th mature and imma .PP751, APP752, and A C99, Amyloid-beta p ent 59, Gamma-secres 	d by APP gene wh ons on the surface of ll fetal tissues and e of Alzheimer dis glycoprotein that ture amyloid beta APP639. APP can b rotein 42, Amyloio stase C-terminal fr	ich locate on human chromosome 21q, i of neurons relevant to neurite growth, d is pronounced in brain, kidney, heart ease type 1 (AD1). Amyloid $\beta$ (A $\beta$ ) exists as several isoforms. This antibod (A4) precursor protein, including APP77 e cleaved into several chains, this d-beta protein 40, C83, P3(40), C80, agment 57, Gamma-secretase C-	
Notable Publications	a cell surface receptor and performs neuronal adhesion and axonogenesi and spleen, but weak in liver. Defect precursor protein (APP) is a 100-140 can recognize several isoforms of bo APP677, APP695, APP696, APP733, A antibody could recognize fragments Gamma-secretase C-terminal fragm terminal fragment 50, C31. Author Pu Shenya Xu 33	protein(APP), encode physiological functions. APP expressed in a sin APP are the cause kDa transmembrane th mature and immar PP751, APP752, and A C99, Amyloid-beta p ent 59, Gamma-secret abmed ID Jo S183805 Sc	d by APP gene wh ons on the surface of all fetal tissues and e of Alzheimer dis glycoprotein that ture amyloid beta APP639. APP can b rotein 42, Amyloio tase C-terminal fr	ich locate on human chromosome 21q, i of neurons relevant to neurite growth, d is pronounced in brain, kidney, heart ease type 1 (AD1). Amyloid β (Aβ) exists as several isoforms. This antibody (A4) precursor protein, including APP77 e cleaved into several chains, this d-beta protein 40, C83, P3(40), C80, agment 57, Gamma-secretase C-

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 25524-1-AP (APP antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. Immunohistochemical analysis of paraffinembedded human gliomas tissue slide using 25524-1-AP (APP, C-Terminal antibody at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human gliomas tissue slide using 25524-1-AP (APP, C-Terminal antibody at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (-20°C Ethanol) fixed SH-SY5Y cells using APP/Beta Amyloid antibody (25524-1-AP) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
