Background Information

E3 ubiquitin-protein ligase RNF217, also known as IBR domain-containing protein 1 (IBRDC1), as a transmembrane (TM) domain-containing RBR-type E3 ubiquitin-protein ligase, belongs to a highly conserved member of the RING finger family. RNF217 mediates the degradation of the iron exporter ferroportin/SLC40A1 and thus regulates iron homeostasis(Uniprot, PMID: 33895792).
