Background Information

Protocadherin-24 (PCDH24, also known as CDHR2 and protocadherin LKC) was originally identified as a novel member of the human non-classical cadherin family. PCDH24 may play a role in cell-cell adhesion and contact inhibition in epithelial cells. PCDH24 expression is markedly reduced in cancers derived from liver and colon tissues, indicating that PCDH24 may play a role as a tumor suppressor protein (PMID: 23115611). The calculated molecular weight of PCDH24 is 142 kDa.
