

For Research Use Only

C1orf112 Polyclonal antibody, PBS Only

Catalog Number: 27863-1-PBS

Basic Information

Catalog Number: 27863-1-PBS	GenBank Accession Number: BC107168	Purification Method: Antigen affinity purification
Size: 100ug, Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 55732	
Source: Rabbit	UNIPROT ID: Q9NSG2	
Isotype: IgG	Full Name: chromosome 1 open reading frame 112	
Immunogen Catalog Number: AG27316	Calculated MW: 853 aa, 97 kDa	
	Observed MW: 98 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

FIRRM (Fanconi anemia pathway and RAD51-mediated DNA repair regulator, also known as C1orf112 or FLIP) is an evolutionarily conserved protein involved in DNA damage repair and homologous recombination. It ensures DNA cross-link (ICL) repair and genomic stability by regulating RAD51 activity. FIRRM expression is upregulated in a variety of tumors and correlates with poor prognosis. Its dysfunction leads to increased genomic instability, as evidenced by enhanced DNA damage signaling, chromosomal abnormalities, and micronucleus formation. The study of FIRRM is important for understanding the mechanisms of tumorigenesis and developing new therapeutic strategies.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

E: proteintech@ptglab.com
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 27863-1-AP (C1orf112 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 27863-1-PBS in a different storage buffer formulation.
