Background Information

SLC10A6, also named as SOAT, belongs to the SLC10 sodium-dependent bile acid (BA) transporter family. SLC10A6 is a transporter of steroid sulfates associated with spermatogenesis and fertility. It has been shown that SLC10A6 might be a new anti-proliferative breast cancer target as the SLC10A6 inhibition can affect the proliferation of breast cancer cells. SLC10A6 also plays a key role in hepatic inflammation. 27938-1-AP antibody detects the 70 kDa glycosylated form in SDS-PAGE. (PMID: 26510996, 30186172, 28893621)
