

For Research Use Only

RTTN Polyclonal antibody, PBS Only

Catalog Number: 31232-1-PBS

Basic Information

Catalog Number:

31232-1-PBS

Size:

100ug, Concentration: 1 mg/ml by Nanodrop;

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG34960

GenBank Accession Number:

NM_173630

GeneID (NCBI):

25914

UNIPROT ID:

Q86VV8

Full Name:

rotatin

Calculated MW:

249 kDa

Observed MW:

246 kDa

Purification Method:

Antigen affinity Purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

RTTN, also known as Rotatin, is an evolutionarily conserved protein that is associated with the centrosome and plays a crucial role in centriole biogenesis. It is found in many organisms and was initially identified in a mutant mouse that exhibited defects in axial rotation and left-right specification. RTTN is required for proper mitotic progression, the maintenance of spindle pole integrity, and correct spindle positioning. Loss of RTTN can lead to mitotic defects, including G2/M phase arrest and increased aneuploidy cells.

Storage

Storage:

Store at -80°C.

Storage Buffer:

PBS Only

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 31232-1-AP (RTN antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 31232-1-PBS in a different storage buffer formulation.
