For Research Use Only

Adiponectin Polyclonal antibody

Catalog Number: 31509-1-AP

Basic Information

Catalog Number:

GenBank Accession Number:

Purification Method: Antigen affinity Purification

31509-1-AP Size: NM_144744.3 GeneID (NCBI):

Recommended Dilutions:

Size.

150ul, Concentration: 400 ug/ml by 246253

WB 1:500-1:1000

Nanodrop:

UNIPROT ID:

Source: Rabbit Q8K3R4 Full Name:

Isotype:

IgG

adiponectin, C1Q and collagen

domain containing

Calculated MW: 26 kDa

Observed MW:

26 kDa

Applications

Tested Applications:

WB, ELISA

Positive Controls:
WB: rat adipose tissue,

Species Specificity:

rat

Background Information

Adiponectin (AdipoQ), an adipocyte-derived hormone, is one of the most abundant adipokines in the blood circulation. Adiponectin modulates a number of metabolic processes, including improving insulin sensitivity and anti-inflammatory activity. The role of AdipoQ in reproduction is not yet fully understood, but the expression of AdipoQ in reproductive tissues has been observed in various animals and humans, including chicken testis, bovine ovary, and human placenta. Adiponectin exerts its effects by activating a range of different signaling molecules via binding to two transmembrane AdipoQ receptors, AdipoR1 and AdipoR2. AdipoR1 is expressed primarily in the skeletal muscle, whereas AdipoR2 is predominantly expressed in the liver. AdipoQ May play a role in cell growth, angiogenesis and tissue remodeling by binding and sequestering various growth factors.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

*** 20ul sizes contain 0.1% BSA

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Rat adipose tissues were subjected to SDS PAGE followed by western blot with 31509-1-AP (Adiponectin antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.
