

For Research Use Only

DRAM Polyclonal antibody, PBS Only

Catalog Number:31777-1-PBS

Basic Information

Catalog Number:

31777-1-PBS

Size:

100ug , Concentration: 1 mg/ml by Nanodrop;

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG33711

GenBank Accession Number:

BC018435

GeneID (NCBI):

55332

UNIPROT ID:

Q8N682

Full Name:

damage-regulated autophagy modulator

Calculated MW:

26 kDa

Observed MW:

33 kDa

Purification Method:

Antigen affinity Purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

Damage-regulated autophagy modulator (DRAM) is a lysosomal membrane protein of autophagy that enriches in lung tissue and plays a central role in p53/TP53-mediated apoptosis (PMID: 16839881), which increased autophagy flux by promoting lysosomal acidification and protease activation (PMID: 23696801). It has 238 amino acids and six hydrophobic transmembrane regions. Reports show DRAM to be downregulated in squamous cancers, indicating a selective pressure to lose DRAM during tumor development (PMID: 17102582). Overexpression of DRAM1 can promote mitophagy and enhance mitochondrial function (PMID: 31204316).

Storage

Storage:

Store at -80°C.

Storage Buffer:

PBS Only

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 31777-1-AP (DRAM antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 31777-1-PBS in a different storage buffer formulation.
