

For Research Use Only

# NTN3 Polyclonal antibody, PBS Only

Catalog Number: 31893-1-PBS

## Basic Information

**Catalog Number:**

31893-1-PBS

**Size:**

100ug, Concentration: 1 mg/ml by Nanodrop;

**Source:**

Rabbit

**Isotype:**

IgG

**Immunogen Catalog Number:**

AG34435

**GenBank Accession Number:**

Netrin-3

**GeneID (NCBI):**

4917

**UNIPROT ID:**

O00634

**Full Name:**

netrin 3

**Calculated MW:**

61 kDa

**Observed MW:**

62-70 kDa

**Purification Method:**

Antigen affinity Purification

## Applications

**Tested Applications:**

WB, Indirect ELISA

**Species Specificity:**

human, mouse, rat

## Background Information

NTN3 (Netrin-3), also known as NTN2L NTN3 (Netrin-3) is predicted to be located in the Golgi apparatus and extracellular region, and it is also predicted to be active in the basement membrane. It is detected in various amounts in the skin, esophagus, bronchus, nasal cavity, kidney, and vagina in healthy human tissues (PMID: 37345154). The protein is predicted to enable signaling receptor binding activity and is involved in animal organ morphogenesis, neuron projection development, and tissue development. Netrins, including NTN3, are a group of proteins that exhibit structural homology to the extracellular matrix protein laminin and influence neurological and tumor progression. NTN3, along with other netrin family members, may play a role in tumor growth and migration in specific organs where they are expressed, potentially affecting disease progression. However, further research is needed to elucidate the precise prognostic and biological implications of NTN3 in various diseases, including cancer (PMID: 32251318). The molecular weight of NTN3 is 62 kDa. It is possible that the protein has glycosylation modification.

## Storage

**Storage:**

Store at -80°C.

**Storage Buffer:**

PBS Only

**This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.**

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 31893-1-AP (NTN3 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 31893-1-PBS in a different storage buffer formulation.
