Background Information

Transcription Factor 20 (TCF20) is a transcriptional activator that binds to the regulatory region of MMP3 and thereby controls stromelysin expression. It stimulates the activity of various transcriptional activators such as JUN, SP1, PAX6 and ETS1, suggesting a function as a coactivator (PMID: 10995766). The calculated molecular weight of TCF20 is 211 kDa, but due to extensive modifications (Glycosylation, Sumoylation, Phosphorylation), the observed molecular weight is about 250 kDa.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 32030-1-AP (TCF20 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 32030-1-PBS in a different storage buffer formulation.
