

For Research Use Only

FANCE Polyclonal antibody, PBS Only

Catalog Number:32520-1-PBS

Basic Information

Catalog Number:

32520-1-PBS

Size:

100ug, Concentration: 1 mg/ml by Nanodrop;

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG38546

GenBank Accession Number:

NM_021922.2

GeneID (NCBI):

2178

UNIPROT ID:

Q9HB96

Full Name:

Fanconi anemia, complementation

group E

Calculated MW:

59 kDa 536aa

Observed MW:

59 kDa

Purification Method:

Antigen affinity Purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

Fanconi anemia group E protein (FANCE) is primarily localized in the nucleoplasm, with additional distribution in mitotic chromosomes and centrosomes. As a key component of the Fanconi anemia (FA) core complex, it plays an essential role in DNA interstrand cross-link repair, serving as a critical bridge between the FA complex and FANCD2 protein (PMID: 12239156; 12093742; 17308347). Cells with FANCE defects exhibit hypersensitivity to DNA cross-linking agents, chromosomal instability, and impaired DNA repair capacity (PMID: 21948210; 28239445; 37563658).

Storage

Storage:

Store at -80°C.

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 32520-1-AP (FANCE antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 32520-1-PBS in a different storage buffer formulation.
