

For Research Use Only

CPTP Polyclonal antibody

Catalog Number: 33114-1-AP

Basic Information

Catalog Number: 33114-1-AP	GenBank Accession Number: NM_001029885	Purification Method: Antigen affinity Purification
Size: 150ul , Concentration: 350 ug/ml by Nanodrop;	GeneID (NCBI): 80772	Recommended Dilutions: WB: 1:500-1:1000
Source: Rabbit	UNIPROT ID: Q5TA50	
Isotype: IgG	Full Name: glycolipid transfer protein domain containing 1	
Immunogen Catalog Number: AG35748	Calculated MW: 24 kDa 214aa	
	Observed MW: 24 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls: WB : Raji cells, Ramos cells
Species Specificity: human	

Background Information

Ceramide-1-phosphate transfer protein (CPTP) is a member of the glycolipid transfer protein (GLTP) family. It is the only identified protein in mammals that can selectively transport ceramide-1-phosphate (C1P) through a non-vesicular mechanism (PMID: 35982909). CPTP plays a crucial role in various biological processes, including cell proliferation, migration, and invasion. It is involved in the regulation of lipid metabolism, particularly in the context of ceramide-1-phosphate, which is a bioactive sphingolipid with roles in cell signaling, inflammation, and autophagy (PMID: 29164996).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol, pH7.3
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 33114-1-AP (CPTP antibody) at dilution of 1:800 incubated at room temperature for 1.5 hours.
