

For Research Use Only

CDY1B Polyclonal antibody, PBS Only

Catalog Number:33231-1-PBS

Basic Information

Catalog Number: 33231-1-PBS	GenBank Accession Number: BC132929	Purification Method: Antigen affinity Purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 253175	
Source: Rabbit	UNIPROT ID: Q9Y6F8	
Isotype: IgG	Full Name: chromodomain protein, Y-linked, 1B	
Immunogen Catalog Number: AG37962	Calculated MW: 540 aa, 60 kDa/554 aa, 62 kDa	
	Observed MW: 65 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

The CDY1B gene, also known as Chromodomain Y-Linked 1B, is a Protein Coding gene located on the Y chromosome. It is one of the two identical copies of the CDY1 gene within the AZFc region of the human Y chromosome. As a histone acetyltransferase, CDY1B exhibits a strong preference for histone 4, suggesting its involvement in both spermatogenic histone replacement and DNA transcription. It plays a significant role in the chromatin remodeling of round spermatid nuclei, contributing to the transition from histone-based chromatin to protamine-based chromatin during spermatogenesis. This transition is essential for the condensation of sperm DNA and the formation of mature sperm. Deletion of either CDY1 can lead to spermatogenic failure and male infertility.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS only, pH7.3

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 33231-1-AP (CDY1B antibody) at dilution of 1:800 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 33231-1-PBS in a different storage buffer formulation.
