

For Research Use Only

ZC3H7A Polyclonal antibody

Catalog Number: 34174-1-AP

Basic Information

Catalog Number: 34174-1-AP	GenBank Accession Number: NM_014153.3	Purification Method: Antigen affinity Purification
Size: 150ul , Concentration: 420 ug/ml by Nanodrop;	GeneID (NCBI): 29066	Recommended Dilutions: WB: 1:1000-1:4000 IF/ICC: 1:200-1:800
Source: Rabbit	UNIPROT ID: Q8IWRO	
Isotype: IgG	Full Name: zinc finger CCCH-type containing 7A	
Immunogen Catalog Number: AG40239	Calculated MW: 110kDa 971aa	
	Observed MW: 110 kDa	

Applications

Tested Applications: WB, IF/ICC, ELISA	Positive Controls: WB : HeLa cells, HepG2 cells, L02 cells, MCF-7 cells IF/ICC : A431 cells,
Species Specificity: human	

Background Information

ZC3H7A (Zinc finger CCCH-type containing 7A, also known as HSPC055 or FLJ20318) is an RNA-binding protein containing zinc finger domains. This protein contains one C2H2-type zinc finger, three CCCH-type zinc fingers, and three TPR repeat sequences, belonging to the class III CCCH zinc finger protein family. ZC3H7A primarily functions in miRNA binding, where it recognizes miRNA hairpin sequences and participates in regulating miRNA biogenesis and processing. Research indicates that this protein plays a significant role in immune regulation: its expression is significantly upregulated upon macrophage activation, Th2 cell activation, and LPS stimulation, and it is enriched in immune organs such as the thymus and spleen. Notably, HIV vaccine studies have found that high expression of ZC3H7A is associated with decreased vaccine protective efficacy. Furthermore, genome-wide association studies suggest its correlation with QT interval duration, though the specific molecular mechanisms require further investigation.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol, pH7.3
Aliquoting is unnecessary for -20°C storage

***** 20ul sizes contain 0.1% BSA**

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 34174-1-AP (ZC3H7A antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Methanol) fixed A431 cells using ZC3H7A antibody (34174-1-AP) at dilution of 1:400 and CoraLite® 488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2).
