Fabp4 Polyclonal antibody

Catalog Number:51035-1-AP 2 Publications

Basic Information	Catalog Number: 51035-1-AP	GenBank Accession Number:	Purification Method:
	Size:	BC054426	Antigen affinity purification
	150ul , Concentration: 133 µg/ml by	GeneID (NCBI): 11770	
	Bradford method using BSA as the	UNIPROT ID:	
	standard;	P04117	
	Source:	Full Name:	
	Rabbit	fatty acid binding protein 4, adipocyte	
	Isotype:	Calculated MW:	
	IgG	15 kDa	
	Immunogen Catalog Number: AG0712	Observed MW: 15 kDa	
Applications	Tested Applications:		
	ELISA Cited Applications: WB, IF		
	Species Specificity: human, mouse, rat		
	Cited Species: mouse, pig		
Background Information	Fatty acid binding protein (FABP) 4 is proteins. FABPs are capable of bindir important for their uptake and intrac- important for the maintenance of lip participates in regulating inflammat FABP4 has been found in a variety of regulator of cell proliferation and po	ng a variety of hydrophobic molecu ellular trafficking. It was first iden id and glucose metabolism. It is al ion and cholesterol trafficking via endothelial cells, where it has bee ssibly angiogenesis. Pathologicall e, diabetes and cancer and vulnera	Iles such as long-chain fatty acids and an tified as an adipocyte-specific protein, so detected in macrophages, where it NFkB and PPAR. In more recent studies, en identified as a target of VEGF and a y, FABP4 has been associated with the bility of atherosclerotic plaques. FABP4
	Fatty acid binding protein (FABP) 4 is proteins.
