For Research Use Only

Cyclophilin A Polyclonal antibody

Catalog Number:51040-1-AP

1 Publications

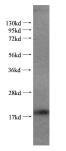

Basic Information	Catalog Number: 51040-1-AP	GenBank Accession Number: BC000689	Purification Method: Antigen affinity purification	
	Size: 150ul, Concentration: 300 µg/ml by Bradford method using BSA as the standard; Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG0480	GenelD (NCBI):	Recommended Dilutions:	
		5478	WB 1:500-1:1000	
		UNIPROT ID: P62937		
		Full Name:		
		peptidylprolyl isomerase A (cyclophilin A)		
		Calculated MW: 18 kDa		
		Observed MW:		
		18 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, ELISA	WB : Jurkat cells,		
	Cited Applications: WB			
	Species Specificity: human, mouse, rat			
	Cited Species:			
	human			
Background Information	human PPIA, also named as CYPA and Rotan PPIases accelerate the folding of pro oligopeptides. PPIA forms a trimolec phosphatase activity. PPIA is incorpo	teins. It catalyzes the cis-trans isor ular complex with cyclophilin and rated into the virion of the type 1 H	type PPIase family and PPIase A subfamily nerization of proline imidic peptide bonds i calcineurins to inhibit calcineurin numan immunodeficiency virus (HIV-1) via nd is crucial for efficient viral replication.	
Background Information Notable Publications	human PPIA, also named as CYPA and Rotan PPIases accelerate the folding of pro oligopeptides. PPIA forms a trimolec phosphatase activity. Application	

For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Jurkat cells were subjected to SDS PAGE followed by western blot with 51040-1-AP (Cyclophilin A antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.
