

For Research Use Only

NEK9 Polyclonal antibody

Catalog Number: 51057-2-AP

Basic Information

Catalog Number: 51057-2-AP	GenBank Accession Number: BC009336	Purification Method: Antigen affinity purification
Size: 150ul , Concentration: 200 µg/ml by Nanodrop and 133 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI): 91754	Recommended Dilutions: IF 1:20-1:200
Source: Rabbit	Full Name: NIMA (never in mitosis gene a)-related kinase 9	
Isotype: IgG	Calculated MW: 107 kDa	
Immunogen Catalog Number: AG1689		

Applications

Tested Applications: IF, ELISA	Positive Controls: IF : COS-7 cells,
Species Specificity: human, monkey	

Background Information

NEK9 is also named as KIAA1995, NEK8, NERCC and belongs to the NEK Ser/Thr protein kinase family. It is independently identified as a Nek6- and Ran GTPase- binding protein under a different name, Nerc1 (PMID:14660563). Nek9, together with the highly similar Nek6 and Nek7, form a signaling module that is activated during mitosis and involved in the regulation of the mitotic spindle. Confocal microscopy identified that Nek9 was localized to the spindle poles at the metaphase stages and associated with the midbody at anaphase or telophase stage in both meiotic oocytes and the first mitotic embryos (PMID: 23159858). The endogenous Nek9 (with predicted molecular mass of 120 kDa) has an apparent molecular mass of 600 kDa, also compatible with a tetramer (PMID:21454704).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunofluorescent analysis of (10% Formaldehyde) fixed COS-7 cells using 51057-2-AP (NEK9 antibody) at dilution of 1:50 and Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
