## For Research Use Only

## STAT5A-Specific Polyclonal antibody Catalog Number: 51074-2-AP 1 Publications

Basic Information	Catalog Number: 51074-2-AP	GenBank Accession Number: BC027036	Purification Method: Antigen affinity purification		
	Size:	GenelD (NCBI):	Recommended Dilutions:		
	150ul , Concentration: 400 ug/ml by Nanodrop and 200 ug/ml by Bradford method using BSA as the standard; Source: Rabbit Isotype: IgG	6776	WB 1:500-1:2400		
		JNIPROT ID: IHC 1:20-1:200 242229			
		Full Name: signal transducer and activator of transcription 5A Calculated MW:			
				794 aa, 92 kDa	
				Observed MW: 92 kDa	
		Applications	Tested Applications:		
			WB, IHC, ELISA	WB: NIH/3	[3 cells, HeLa cells, HepG2 cells
Cited Applications: WB			IC : human cervical cancer tissue, human breast Incer tissue, human lung cancer tissue		
Species Specificity: human, mouse					
Cited Species: human					
Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	vely, antigen				
Background Information	factors, STAT family members are ph heterodimers that translocate to the o and mediates the responses of many different GH. Activation of STAT5A in independent of cell stimulus and has	osphorylated by the receptor associ cell nucleus where they act as transoc cell ligands, such as IL2, IL3, IL7 GM myeloma and lymphoma associate been shown to be essential for the expression of BCL2L1/BCL-X(L), wh	ated kinases, and then form homo- or ription activators. STAT5A is activated by CSF, erythropoietin, thrombopoietin, and d with a TEL/JAK2 gene fusion is sumorigenesis. The mouse counterpart of ich suggests the antiapoptotic function of		
	factors, STAT family members are ph heterodimers that translocate to the c and mediates the responses of many different GH. Activation of STAT5A in independent of cell stimulus and has human STAT5A is found to induce the STAT5A in cells. This antibody is spec	osphorylated by the receptor associ cell nucleus where they act as transc cell ligands, such as IL2, IL3, IL7 GM myeloma and lymphoma associate been shown to be essential for the expression of BCL2L1/BCL-X(L), wh cific to STAT5A. It has no cross react	ription activators. STAT5A is activated by -CSF, erythropoietin, thrombopoietin, and ed with a TEL/JAK2 gene fusion is sumorigenesis. The mouse counterpart of ich suggests the antiapoptotic function of ion to STAT5B.		
Background Information	factors, STAT family members are ph heterodimers that translocate to the of and mediates the responses of many different GH. Activation of STAT5A in independent of cell stimulus and has human STAT5A is found to induce the STAT5A in cells. This antibody is spec Author Pub	osphorylated by the receptor associ cell nucleus where they act as transc cell ligands, such as IL2, IL3, IL7 GM myeloma and lymphoma associate been shown to be essential for the i expression of BCL2L1/BCL-X(L), wh cific to STAT5A. It has no cross react	ated kinases, and then form homo- or ription activators. STAT5A is activated by CSF, erythropoietin, thrombopoietin, and ed with a TEL/JAK2 gene fusion is sumorigenesis. The mouse counterpart of ich suggests the antiapoptotic function of ion to STAT5B. Application

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Immunohistochemical analysis of paraffinembedded human cervical cancer using 51074-2-AP (STAT5A-Specific antibody) at dilution of 1:100 (under 10x lens).

Immunohistochemical analysis of paraffinembedded human cervical cancer using 51074-2-AP (STAT5A-Specific antibody) at dilution of 1:100 (under 40x lens).

NIH/3T3 cells were subjected to SDS PAGE followed by western blot with 51074-2-AP (STAT5A-Specific antibody) at dilution of 1:400 incubated at room temperature for 1.5 hours.
