## Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed mouse skin tissue using 55328-1-AP (Involucrin antibody) at dilution of 1:50 and Alexa Fluor 488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).

Raji cells were subjected to SDS PAGE followed by western blot with 55328-1-AP (IVL antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffinembedded human skin cancer tissue slide using 55328-1-AP (Involucrin antibody) at dilution of 1:200 (under 10x lens).
