Background Information

SH3RF3 is a ubiquitously expressed RING finger E3 ligase that belongs to the POSH protein family. SH3RF3 also has a partial CRIB domain that has RAC1-binding activity (PMID: 20696164). SH3RF3 contains four SH3 domains for protein interactions and a ring finger domain that confers E3 ubiquitin ligase activity, possibly targeting itself and other proteins for proteasomal degradation (PMID: 41291187).
