Background Information

PLIN4 (Perilipin 4) is a member of the perilipin family, a group of proteins that coat lipid droplets in adipocytes, the adipose tissue cells that are responsible for storing fat. The proteins in the Perilipin family are crucial regulators of lipid storage. PLIN4 expression is elevated in obese animals and humans. Plin4 is a lipid droplet protein (LDP) found predominantly in white adipose tissue (PMID: 23423172). It is lower expression in heart, skeletal muscle, and brown adipose tissue (PMID: 17878492).
