For Research Use Only

Neuropilin 1 Monoclonal antibody

Catalog Number:60067-1-lg Featured Product 23 Publications

Basic Information	Catalog Number: 60067-1-lg	GenBank Accession N BC007737	lumber:	Purification Method: Protein A purification			
	Size: 150ul , Concentration: 1500 ug/ml by	GenelD (NCBI): 8829		CloneNo.: 2H3F6			
	Source: Mouse Isotype: IgG1 Immunogen Catalog Number:	dUNIPROT ID: 014786 Full Name: neuropilin 1 Calculated MW: 103 kDa		Recommended Dilutions: WB 1:1000-1:6000 IF/ICC 1:50-1:500			
					Observed MW: 130 kDa		
					Applications	Tested Applications:	
		Cited Applications: human plas		human plasm		ın placenta tissue, fetal human brain tissue, asma, 37°C incubated human placenta tissu issue, HeLa cells, rabbit heart tissue, MDA-	
Species Specificity:		MB-231 cells, A549 cells, pig heart tissue					
human, pig, rabbit IF/ICC : SH-SY5Y cells, human embror Cited Species: human, mouse, rabbit, xenopus							
Background Information	a semaphorin (SEMA) receptor, involv as a receptor for vascular endothelial	other normal cell type ed in axonal guidance growth factor (VEGF) ad the receptor tyrosin	s and malignan e in embryonic o and a promoter e kinase (RTK) \	sed by endothelial, dendritic, and t tumor cells. NRP1 was first identified a development. NRP1 was also shown to a of angiogenesis through its interaction /EGF-R2. NRP1 plays versatile roles in			
Background Information Notable Publications	regulatory T cells, as well as several of a semaphorin (SEMA) receptor, involv as a receptor for vascular endothelial with VEGF-A165 (and other VEGFs) ar angiogenesis, axon guidance, cell sur	other normal cell type ed in axonal guidance growth factor (VEGF) ad the receptor tyrosin	s and malignan e in embryonic c and a promoter e kinase (RTK) \ invasion.	t tumor cells. NRP1 was first identified a development. NRP1 was also shown to a of angiogenesis through its interaction

NRP1 was first identified a development. NRP1 was also shown to a of angiogenesis through its interaction /EGF-R2. NRP1 plays versatile roles in Application			

Store at -20°C. Stable for one year after shipment. Storage Buffer: PBS with 0.1% sodium azide and 50% glycerol pH 7.3. Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 60067-1-lg (Neuropilin 1 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.

Confocal immunofluorescent analysis of human embronic stem cells with 60067-1-Ig at dilution of 1:100. DAPI was used to stain the cell nuclei (blue) at a concentration of 1ug/ml. This photo is the merge of PE and DAPI. (40X)

Immunofluorescent analysis of (-20°C Ethanol) fixed SH-SY5Y cells using 60067-1-1g(Neuropilin 1 antibody) at dilution of 1:100 and Alexa Fluor 488conjugated AffiniPure Goat Anti-Mouse IgG(H+L).

Confocal immunofluorescent analysis of human embronic stem cells with 60067-1-lg at dilution of 1:100. DAPI was used to stain the cell nuclei (blue) at a concentration of 1ug/ml. This photo is the merge of PE and DAPI. (40X).
