CUL4B Monoclonal antibody

Catalog Number:60151-1-lg Featured Product 5 Publications

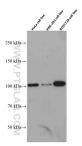

Basic Information	Catalog Number: 60151-1-lg	GenBank Access BC036216	ion Number:	Purification Method: Caprylic acid/ammonium sulfate	
	Size: Genel D (NCBI):			precipitation	
	150ul, Concentration: 2100 ug/ml by 8450		CloneNo.:		
	Nanodrop and 1000 ug/ml by Bradford _{UNIPROT ID:}			4E10B10 Recommended Dilutions:	
	Source:	Q13020		WB 1:1000-1:4000 IHC 1:50-1:500	
	Mouse	Full Name: cullin 4B			
	lsotype: lgG1	Calculated MW: 913 aa, 104 kDa			
	Immunogen Catalog Number: AG3563	Observed MW: 102 kDa			
Applications	Tested Applications: WB, IHC, ELISA		Positive Controls:		
	Cited Applications:			lls, HEK-293 cells, ROS1728 cells gliomas tissue,	
	WB, IHC Species Specificity: human, rat				
	Cited Species: human, mouse				
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0				
Background Information	Cullin-RING ligases (CRLs) complexes participate in the regulation of diverse cellular processes, including cell cycl progression, transcription, signal transduction and development (PMID: 21816341)(PMID: 21554755). Serving as the scaffold protein, cullins are crucial for the assembly of ligase complexes, which recognize and target various substrates for proteosomal degradation. Two cullin 4 (CUL4) proteins, CUL4A (87 kDa) and CUL4B (104 kDa), are two members in cullin family with 83% of identity. Mutations in human CUL4B are one of the major causes of X-linked mental retardation. Cul4b knockout mice demonstrated that CUL4B is indispensable for embryonic development in the mouse (PMID: 22606329).

Selected Validation Data

various lysates were subjected to SDS PAGE followed by western blot with 60151-1-1g (CUL4B antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.

WB result of CUL4B antibody (60151-1-Ig, 1:500) with si-Control and si-CUL4B transfected HeLa cells.

HeLa cells were subjected to SDS PAGE followed by western blot with 60151-1-1g (CUL4B Antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.
