

For Research Use Only

EPHA1-special Monoclonal antibody

Catalog Number: 60155-1-Ig

Basic Information

Catalog Number: 60155-1-Ig	GenBank Accession Number: BC130291	Purification Method: Protein G purification
Size: 150ul	GeneID (NCBI): 2041	CloneNo.: 5B9E8
Source: Mouse	UNIPROT ID: P21709	
Isotype: IgG1	Full Name: EPH receptor A1	
	Calculated MW: 108 kDa	

Applications

Tested Applications:
ELISA

Species Specificity:
human

Background Information

EPHA1, also named as EPH, EPHT and EPHT1, belongs to ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats. Ligands in the ephrin-A subclass, including the prototype family member ephrin-A1 (B61), are membrane associated through glycosylphosphatidyl-inositol linkages, whereas ephrin-B subclass consists of ligands with transmembrane domains. The general role of the Eph family is in mediating repulsive cell-cell interaction.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA
