

For Research Use Only

Anti-Mouse CD357 (GITR) (DTA-1)

Catalog Number: 65102-1-Ig

Basic Information

| | | |
|--------------------------------------|---|--|
| Catalog Number: 65102-1-Ig | GenBank Accession Number: BC146517 | Purification Method: Affinity purification |
| Size: 500ug , 500 µg/ml | GeneID (NCBI): 21936 | CloneNo.: DTA-1 |
| Source: Rat | Full Name: tumor necrosis factor receptor superfamily, member 18 | |
| Isotype: IgG2b, kappa | | |

Applications

Tested Applications:
FC

Species Specificity:
Mouse

Background Information

Glucocorticoid-induced TNFR-related protein (GITR), also known as CD357 or TNFRSF18, is a member of the tumor necrosis factor receptor (TNF-R) superfamily. GITR is expressed constitutively at high levels in T regulatory cells (Treg cells) and plays a key role in dominant immunological self-tolerance maintained by CD25+CD4+ regulatory T cells (PMID: 11812990). It is expressed at low levels on resting responder T cells. The expression of GITR on T cells can be upregulated upon activation (PMID: 15770698). GITR is activated by GITR ligand (GITRL) which is mainly expressed on APC. GITR-GITRL interactions could co-stimulate both responder T-cell functions and the suppressive functions of Treg cells (PMID: 16868552).

Storage

Storage:
Store at 2-8°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.09% sodium azide.

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1x10⁶ mouse splenocytes were surface stained with 0.5 ug Anti-Mouse CD357 (GITR) (65102-1-Ig, Clone:DTA-1) or 0.5 ug Rat IgG2b Isotype Control (LTF-2) (65211-1-Ig, Clone: LTF-2) and FITC anti-rat IgG2b Antibody at dilution 1:100. Cells were co-stained with CoraLite 647 Anti-Human CD25. CD4⁺ cells were gated. Cells were not fixed.
