

For Research Use Only

Anti-Mouse CD62L (MEL14)

Catalog Number: 65219-1-Ig

Basic Information

Catalog Number:

65219-1-Ig

Size:

500ug, 0.5 mg/ml

Source:

Rat

Isotype:

IgG2a, kappa

GenBank Accession Number:

BC052681

GeneID (NCBI):

20343

UNIPROT ID:

P18337

Full Name:

selectin, lymphocyte

Purification Method:

Protein A purification

CloneNo.:

MEL14

Applications

Tested Applications:

FC

Species Specificity:

Mouse

Background Information

CD62L, also known as L-selectin or SELL, is a member of the selectin family of adhesion molecules that also include CD62E (E-selectin) and CD62P (P-selectin) (PMID: 2663882, 2473156, 1382078). CD62L is a highly glycosylated protein of 95-105 kDa on neutrophils and 74 kDa on lymphocytes (PMID: 1382078; 1694883, 1695155). CD62L is expressed on the surface of most leukocytes, including lymphocytes, neutrophils, monocytes, eosinophils, hematopoietic progenitor cells, and immature thymocytes (PMID: 1694883, 1688580). It mediates the binding of lymphocytes to high endothelial venules (HEV) of peripheral lymph nodes through interactions with a constitutively expressed ligand, and is also involved in lymphocyte, neutrophil, and monocyte attachment to endothelium at sites of inflammation (PMID: 1382078).

Storage

Storage:

Store at 2-8°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ C57BL/6 mouse splenocytes were surface co-stained with APC Anti-Mouse CD3ε (145-2C11) and 0.5 ug Anti-Mouse CD62L (65219-1-Ig, Clone:MEL14) and FITC anti-rat IgG2a Antibody at dilution 1:100, and 0.5 ug rat IgG2a isotype control and FITC anti-rat IgG2a Antibody at dilution 1:100. Cells were not fixed.
