

For Research Use Only

Anti-Rat CD45RA (OX-33)

Catalog Number: 65234-1-Ig

Basic Information

Catalog Number: 65234-1-Ig	GenBank Accession Number: XM_006249910	Purification Method: Affinity purification
Size: 100ug, 0.5 mg/ml	GeneID (NCBI): 24699	CloneNo.: OX-33
Source: Mouse	Full Name: protein tyrosine phosphatase, receptor type, C	
Isotype: IgG1, kappa	Calculated MW: 143 kDa	

Applications

Tested Applications:
FC

Species Specificity:
Rat

Background Information

CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). CD45 exists as multiple isoforms due to alternative splicing of three exons (4, 5, and 6, designated A, B, and C) in the extracellular domain (PMID: 12414720). CD45RA is expressed on naive T cells, B cells, and monocytes (PMID: 1830500; 14687231).

Storage

Storage:
Store at 2-8°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.09% sodium azide.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ Wistar rat splenocytes were surface stained with 0.5 ug Anti-Rat CD45RA (65234-1-Ig, Clone:OK-33) and FITC anti-Mouse IgG1 Antibody at dilution 1:100, or 0.5 ug Control Antibody. Cells were not fixed.
