## Anti-Human CD42b (AK2) Mouse IgG2a Recombinant Antibody

Catalog Number:65588-1-MR

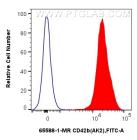

Catalog Number:	GenBank Accession Number:	Purification Method:
65588-1-MR		Protein A purification
Size:		CloneNo.:
		AK2
Source: Mouse	ENSEMBL Gene ID: ENSG00000185245	
Isotype: IgG2a	Full Name: glycoprotein Ib (platelet), alpha polypeptide	
	Calculated MW: 626 aa, 69 kDa	
Tested Applications: FC		
Species Specificity: Human		
CD42b, also known as platelet glycoprotein Ib alpha chain (GPIb alpha), is a type I transmembrane glycoprotein of 135-145 kDa (PMID: 2656709). It is expressed on platelets and megakaryocytes. CD42b and CD42c (GPIb beta) are linked by a disulphide bond to form GPIb (PMID: 7660135). GPIb forms a noncovalent complex with CD42a (GPIX) and CD42d (GPV) and acts as a receptor for von Willebrand factor (vWF) and thrombin (PMID: 7660135; 3759960). The GPIb-V-IX complex mediates vWF-dependent platelet adhesion to blood vessels. Defects in the expression of CD42b result in Bernard-Soulier syndromes and platelet-type von Willebrand disease (PMID: 9371310).

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

1x10^6 human peripheral blood platelets were surface stained with 0.25 ug Anti-Human CD42b Mouse IgG2a Recombinant Antibody (65588-1-MR, Clone: AK2) (red) or Mouse IgG2a Isotype Control (65208-1-Ig, Clone: C1.18.4) (blue) and CoraLite®488-Conjugated Donkey Anti-Mouse IgG(H+L). Cells were not fixed.
