For Research Use Only

MYC-tag Monoclonal antibody

Catalog Number:66004-1-lg 59 Publications

Basic Information

Catalog Number:

66004-1-lg

Size:

150ul , Concentration: $667 \, \mu g/ml$ by Bradford method using BSA as the

standard;

Source: Mouse

Isotype: IgG1 GenBank Accession Number:

GeneID (NCBI):

99

Full Name:

Myc tag

Purification Method: Protein A purification

CloneNo.: 2D11A8

Applications

Tested Applications:

ELISA

Cited Applications: WB, IF, IP, CoIP

Species Specificity: recombinant protein

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The Myc tag corresponds to amino acid residues(EQKLISEEDL) of the human c-Myc protein. It can be used for affinity chromatography, then used to separate recombinant, overexpressed protein from wild type protein expressed by the host organism. It can also be used in the isolation of protein complexes with multiple subunits. Myc-Tag mouse mAb detects recombinant proteins containing the Myc tag. The antibody recognizes the Myc-tag EQKLISEEDL fused to either the amino- or carboxy- terminus of targeted proteins.

Notable Publications

| Author | Pubmed ID | Journal | Application |
|--------------------|-----------|-------------------|-------------|
| Zhangtao Jiang | 27681138 | J Virol | |
| Maolin Ge | 28954889 | J Immunol | WB |
| Jennifer J Schwarz | 34526379 | Life Sci Alliance | WB,IP |

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data
