For Research Use Only

## HA-Tag Monoclonal antibody

Catalog Number:66006-1-lg 107 Publications

Basic Information	Catalog Number: 66006-1-lg	GenBank Accession Number: HA	Purification Method: Protein G purification
	Size:	GeneID (NCBI):	CloneNo.:
	150ul , Concentration: 500 µg/ml by Bradford method using BSA as the standard;	Full Name:	1C1D2
	Source: Mouse		
	Isotype: IgG1		
Applications	Tested Applications: ELISA		
	Cited Applications: WB, IHC, IF, IP, CoIP, ChIP		
	Species Specificity: recombinant protein		
Background Information	facilitates one or several of the follo expression. The HA tag is correspond hemagglutinin(HA). Many recombina to interfere with the bioactivity or th isolation, and purification of the prot	wing characteristics: solubility, d Is to amino acid residues YPYDVP ant proteins have been engineere e biodistribution of the recombin teins. The HA tag is useful in west	or N- terminal of the target protein, which etection, purification, localization and DYA of human influenza virus d to express the HA tag, which does not apper ant protein. This tag facilitates the detection, rern blotting and immunohistochemical dies raised specifically against the HA-tag.
	facilitates one or several of the follo expression. The HA tag is correspond hemagglutinin(HA).
