## PD-1/CD279 Monoclonal antibody Catalog Number:66220-1-Ig Featured Product 54 Publications

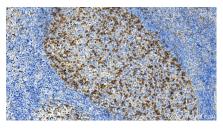

Basic Information	Catalog Number: 66220-1-lg	GenBank Accession Nu BC074740	mber:	Purification Method: Protein A purification	
	Size:	GenelD (NCBI):		CloneNo.:	
	150ul , Concentration: 1500 ug/ml by			4H4D1	
	Nanodrop;	UNIPROT ID:		Recommended Dilutions:	
	Source:	Q15116		WB 1:5000-1:50000	
	Mouse	Full Name:		IHC 1:2000-1:8000	
	Isotype:	programmed cell death	11	IF-P 1:200-1:800	
	IgG2b	Calculated MW:			
	Immunogen Catalog Number: AG12470	288 aa, 32 kDa			
		Observed MW: 32 kDa, 47-55 kDa			
Applications	Tested Applications:		Positive Controls:		
	WB, IHC, IF-P, ELISA		WB: RAW 264	.7 cells, human lymph node tissue, rat	
	WB, IHC, IF MOL		•	ı tissue, mouse thymus tissue, Jurkat cells, 4 cells, THP-1 cells, CTLL-2 cells, pig thymus	
	Species Specificity: human, mouse, rat, pig		ussue IHC : human tonsillitis tissue, human lymphoma tissu		
	Cited Species: human, mouse, rat			onsillitis tissue, human lymphoma	
	retrieval may be performed w buffer pH 6.0	ith citrate			
Background Information	Programmed cell death 1 (PD-1, also known as CD279) is an immunoinhibitory receptor that belongs to the CD28/CTLA-4 subfamily of the Ig superfamily. It is a 288 amino acid (aa) type I transmembrane protein composed of one Ig superfamily domain, a stalk, a transmembrane domain, and an intracellular domain containing an immunoreceptor tyrosine-based inhibitory motif (ITIM) as well as an immunoreceptor tyrosine-based switch motif (ITSM) (PMID: 18173375). PD-1 is expressed during thymic development and is induced in a variety of hematopoietic cells in the periphery by antigen receptor signaling and cytokines (PMID: 20636820). Engagement of PD-1 by its ligands PD-L1 or PD-L2 transduces a signal that inhibits T-cell proliferation, cytokine production, and cytolytic function (PMID: 19426218). It is critical for the regulation of T cell function during immunity and tolerance. Blockade of PD-1 can overcome immune resistance and also has been shown to have antitumor activity (PMID: 22658127; 23169436). The calculated molecular weight of PD-1 is 32 kDa. It has been reported that PD-1 is heavily glycosylated and migrates with an apparent molecular mass of 47-55 kDa on SDS-PAGE (PMID: 8671665; 17640856; 17003438).				
Background Information	of one Ig superfamily domain, a stalk immunoreceptor tyrosine-based inhil (ITSM) (PMID: 18173375). PD-1 is exp hematopoietic cells in the periphery PD-1 by its ligands PD-L1 or PD-L2 tra cytolytic function (PMID: 19426218). Blockade of PD-1 can overcome immu 22658127; 23169436). ## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 66220-1-1g (PD-1/CD279 antibody) at dilution of 1:15000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated Lamin B1 Monoclonal antibody (HRP-66095) as loading control.

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 66220-1-1g (PD-1/CD279 antibody) at dilution of 1:4000 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (4% PFA) fixed human tonsillitis tissue using PD-1/CD279 antibody (66220-1-1g, Clone: 4H4D1) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L).

Immunofluorescent analysis of (4% PFA) fixed human tonsillitis tissue using PD-1/CD279 mouse mAb (66220-1-1g) at dilution of 1:50 and CD20 rabbit pAb (24828-1-AP) at dilution of 1:50, further stained with Alexa Fluor 488-conjugated AffiniPure Goat Anti-Mouse IgG(H+L) for 66220-1-1g, and Alexa Fluor 594-conjugated AffiniPure Goat Anti-Rabbit IgG (H+L) for 24828-1-AP.

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 66220-1-1g (PD-1/CD279 antibody) at dilution of 1:20000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
