

For Research Use Only

RhoGDI Monoclonal antibody

Catalog Number: 66480-1-Ig **Featured Product**

Basic Information

Catalog Number: 66480-1-Ig	GenBank Accession Number: BC005851	Purification Method: Protein A purification
Size: 150ul , Concentration: 2100 µg/ml by Nanodrop and 1500 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI): 396	CloneNo.: 1B1G9
Source: Mouse	Full Name: Rho GDP dissociation inhibitor (GDI)	Recommended Dilutions: WB 1:500-1:3000
Isotype: IgG2a	alpha	
Immunogen Catalog Number: AG0791	Calculated MW: 28 kDa	
	Observed MW: 28 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls: WB : HeLa cells, C6 cells, HEK-293 cells
Species Specificity: Human, Mouse, Rat	

Background Information

Rho GDP-dissociation inhibitor (RhoGDI), also called ARHGDI, is one member of ARHGDI, which is ubiquitously expressed and interacts with several Rho GTPases, mainly including RhoA, Rac1, and Cdc42. RhoGDI can inhibit nucleotide exchange and membrane association to downregulate the activities of Rho family GTPase. It is overexpressed in various human cancers. Activity of this protein is important in a variety of cellular processes, and it is overexpressed in various human cancers. Mutations in RhoGDI have been found in individuals with nephrotic syndrome, type 8.

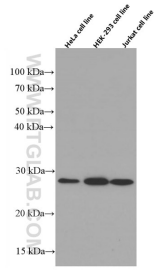

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 66480-1-Ig (ARHGDI, α GDI antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.

WB result of RhoGDI antibody (66480-1-Ig; 1:2000; incubated at room temperature for 1.5 hours) with sh-Control and sh-RhoGDI transfected HEK-293 cells.
