## HIF2a/EPAS1 Monoclonal antibody

Catalog Number:66731-1-lg 7 Publications

Basic Information	Catalog Number: 66731-1-lg	GenBank Accession Number: BC051338	Purification Method: Protein A purification				
	Size:	GeneID (NCBI):	CloneNo.:				
	150ul , Concentration: 1600 ug/ml by	2034	2F6B12				
	Nanodrop and 1000 ug/ml by Bradford method using BSA as the standard;	<sup>d</sup> UNIPROT ID: Q99814	Recommended Dilutions: WB 1:1000-1:5000 IHC 1:250-1:1000				
	Source:	Full Name:					
	Mouse Isotype: IgG2a Immunogen Catalog Number:	endothelial PAS domain protein 1 Calculated MW: 96 kDa Observed MW: 120 kDa					
				Applications	Tested Applications:	Positive Controls:	
					WB, IHC, ELISA	WB : HeLa cells, HepG2 cells	
Cited Applications: WB, IHC, IF	IHC : human colon cancer tissue,						
Species Specificity: Human							
Cited Species: human, bovine							
Note-IHC: suggested antigen re TE buffer pH 9.0; (*) Alternativ retrieval may be performed wi buffer pH 6.0	vely, antigen						
Background Information	vessels and the tubular system of lung the blood brain barrier. Potent activat recruitment of transcriptional coactiva	involved in the induction of oxyge sypoxia response element (HRE) of EGF) expression and seems to be in g. May also play a role in the forma or of the Tie-2 tyrosine kinase expr ators such as CREBPB and probably . EPAS1 is expressed in most tissue	n regulated genes. Binds to core DNA target gene promoters. Regulates the nplicated in the development of blood tion of the endothelium that gives rise to ression. Activation seems to require EP300. Interaction with redox regulatory				
	alpha,HIF2A), is a transcription factor sequence 5'-[AG]CGTG-3' within the h vascular endothelial growth factor (VI vessels and the tubular system of lung the blood brain barrier. Potent activator recruitment of transcriptional coactivator protein APEX seems to activate CTAD heart. Selectively expressed in endot	involved in the induction of oxyge pypoxia response element (HRE) of EGF) expression and seems to be in g. May also play a role in the forma or of the Tie-2 tyrosine kinase expr ators such as CREBPB and probably . EPAS1 is expressed in most tissue helial cells.	n regulated genes. Binds to core DNA target gene promoters. Regulates the nplicated in the development of blood tion of the endothelium that gives rise to ression. Activation seems to require EP300. Interaction with redox regulatory is, with highest levels in placenta, lung ar

## Selected Validation Data

untreated and cobalt chloride treated Hela cells were subjected to SDS PACE followed by western blot with 66731-1-1g (EPAS1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. Immunohistochemical analysis of paraffinembedded human colon cancer tissue slide using 66731-1-Ig (EPAS1 antibody) at dilution of 1:500 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
