CEP250,C-NAP1 Monoclonal antibody

Catalog Number:66814-1-lg 2 Publications

Basic Information	Catalog Number: 66814-1-lg	GenBank Accession Numb BC001433	per: Purification Me Protein A purifi		
	Size: 150ul , Concentration: 1600 ug/ml by		CloneNo.: 2G12D12		
	Nanodrop and 1000 ug/ml by Bradford method using BSA as the standard;	^d UNIPROT ID: Q9BV73	WB 1:1000-1:80	Recommended Dilutions: WB 1:1000-1:8000 IF/ICC 1:400-1:1500	
	Source: Mouse	Full Name: centrosomal protein 250k			
	Isotype: IgG1	Calculated MW: 281 kDa			
	Immunogen Catalog Number: AG5925	Observed MW: 280 kDa			
Applications	Tested Applications:	Pc	sitive Controls:	ve Controls:	
	WB, IF/ICC, ELISA Cited Applications:		WB : HeLa cells, HEK-293 cells, HepG2 cells, Jur cells, K-562 cells, HL-60 cells IF/ICC : HepG2 cells,		
	IHC, IF Species Specificity: Human	IF			
	Cited Species: human, mouse				
	CEP250, also known as C-Nap1, is a coiled-coil protein that localizes to the proximal ends of mother and daughter centrioles. It is required for centriole-centriole cohesion during interphase of the cell cycle. It dissociates from the centrosomes when parental centrioles separate at the beginning of mitosis. The protein associates with and is phosphorylated by NIMA-related kinase 2, which is also associated with the centrosome.				
Background Information	centrioles. It is required for centriole- centrosomes when parental centriole	centriole cohesion during i s separate at the beginning	nterphase of the cell cycle. I g of mitosis. The protein asso	t dissociates from th

For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using CEP250,C-NAP1 antibody (66814-1-Ig, Clone: 2G12D12) at dilution of 1:773 and Multi-rAb CoraLite® Plus 594-Goat Anti-Mouse Recombinant Secondary Antibody (H+L) (Cat.NO. RGAM004).

Various lysates were subjected to SDS PAGE followed by western blot with 66814-1-Ig (CEP250,C-NAP1 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.
