## GLI1 Monoclonal antibody

Catalog Number:66905-1-lg Featured Product 78 Publications

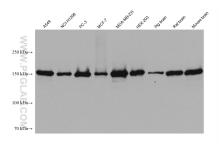

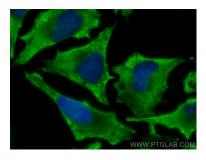

Basic Information	Catalog Number: 66905-1-lg	GenBank Accession N BC013000	umber:	Purification Method: Protein A purification							
	Size:	GeneID (NCBI): 2735 UNIPROT ID: P08151 Full Name: GLI family zinc finger 1 Calculated MW: 1106 aa, 118 kDa		CloneNo.: 1D2B2							
	150ul , Concentration: 1000 ug/ml by Nanodrop; Source: Mouse Isotype: IgG1 Immunogen Catalog Number: AG27832										
				Recommended Dilutions: WB 1:5000-1:50000 IF/ICC 1:400-1:1600							
					Observed MW: 150 kDa						
					Applications	Tested Applications:		Positive Con	sitive Controls:		
						Cited Applications:tissueWB, IHC, IF, IP, CoIPPC-3 cl		WB : A549 cells, C6 cells, HEK-293 cells, human testis			
									ue, 4T1 cells, mouse brain tissue, NCI-H1299 cel 3 cells, MCF-7 cells, MDA-MB-231 cells, pig brair ue, rat brain tissue, BxPC-3 cells, U-251 cells,		
human, mouse, rat, pig	mouse liver tissue, rat liver tissue										
Cite d Canadian		IF/ICC : HeLa cells,									
	Cited Species:			,							
	human, mouse, rat										
Background Information	human, mouse, rat GLI 1, also known as Glioma-associatu zinc-finger protein family. GLI 1 is det cerebellum, optic nerve and olfactory (PubMed:10806483). GLI 1 is activated	ected in testis and Also e tract. GLI 1 is tethered d and translocated to the n of GLI 1 by ULK3 may p gulate the transcription e in craniofacial develo system and gastrointest	amino acid pro o expressed in in the cytoplas e nucleus prom promote nuclea of specific ger opment and dig tinal tract and	otein, which belongs to the GLI C2H2-ty the brain with highest expression in the sm by binding to SUFU noted by interaction with STK36 ar localization (PubMed: 19878745). GLI nes during normal development gital development, as well as Mediates SHH signaling							
	human, mouse, rat GLI1, also known as Glioma-associate zinc-finger protein family. GLI1 is det cerebellum, optic nerve and olfactory (PubMed:10806483). GLI1 is activated (PubMed:10806483). Phosphorylatior as a transcriptional activator may reg (PubMed:19706761). GLI1 plays a role development of the central nervous s (PubMed:19706761). GLI1 plays a role	ected in testis and Also e tract. GLI 1 is tethered d and translocated to the n of GLI 1 by ULK3 may p gulate the transcription e in craniofacial develo system and gastrointest	amino acid pro o expressed in in the cytoplas he nucleus pron promote nuclea of specific ger opment and dig tinal tract and nd differentiat	otein, which belongs to the GLI C2H2-ty the brain with highest expression in the sm by binding to SUFU noted by interaction with STK36 ar localization (PubMed: 19878745). GLI nes during normal development gital development, as well as Mediates SHH signaling							
	human, mouse, rat GLI 1, also known as Glioma-associatu zinc-finger protein family. GLI 1 is det cerebellum, optic nerve and olfactory (PubMed:10806483). GLI 1 is activated (PubMed:10806483). Phosphorylation as a transcriptional activator may reg (PubMed:19706761). GLI 1 plays a role development of the central nervous s (PubMed:19706761). GLI 1 plays a role Author Put	ected in testis and Also reacted in testis and Also react. GLI 1 is tethered and translocated to the of GLI 1 by ULK3 may p gulate the transcription e in craniofacial develor ystem and gastrointest e in cell proliferation and owned ID Journ	amino acid pro o expressed in in the cytoplas he nucleus pron promote nuclea of specific ger opment and dig tinal tract and nd differentiat	otein, which belongs to the GLI C2H2-ty the brain with highest expression in the sm by binding to SUFU noted by interaction with STK36 ar localization (PubMed:19878745). GLI nes during normal development gital development, as well as Mediates SHH signaling ion via its role in SHH signaling.							
	human, mouse, rat GLI1, also known as Glioma-associatu zinc-finger protein family. GLI1 is det cerebellum, optic nerve and olfactory (PubMed:10806483). GLI1 is activatee (PubMed:10806483). Phosphorylatior as a transcriptional activator may reg (PubMed:19706761). GLI1 plays a role development of the central nervous s (PubMed:19706761). GLI1 plays a role development of the central nervous s (PubMed:19706761). GLI1 plays a role Author Put Qian Wang 325	ected in testis and Also reacted in testis and Also react. For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 66905-1-lg (GLI 1 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using GLI 1 antibody (66905-1-lg, Clone: 1D2B2 ) at dilution of 1:800 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L).
