For Research Use Only

PITX2 Monoclonal antibody

Catalog Number:67201-1-lg Featured Product 2 Publications

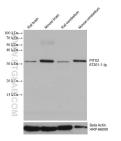

Catalog Number: 67201-1-lg	GenBank Accession Number: BC013998	Purification Method: Protein A purification	
Size:	GenelD (NCBI):	CloneNo.:	
• •		1E3B1	
method using BSA as the standard;	UNIPROT ID: Q99697	Recommended Dilutions: WB 1:5000-1:50000	
Source: Mouse	Full Name: paired-like homeodomain 2		
lsotype: lgG1	Calculated MW: 36 kDa		
Immunogen Catalog Number: AG27924	Observed MW: 30 kDa		
Tested Applications:	Positive Controls:		
Cited Applications:	WB : rat brain tissue, HEK-293 cells, mouse brain tissue, rat cerebellum tissue, mouse cerebellum tissue		
Species Specificity:			
Cited Species: mouse, rat			
PITX2 belongs to the bicoid class of h	•	, which play essential roles in embryonic	
right signaling. It controls cell prolife embryonic development, PITX2 is inv the proper localization of asymmetric	ration in a tissue-specific manner rolved in the expansion of muscle c organs such as the heart and stor	f developmental programs, including left- and is involved in morphogenesis. During progenitors. In addition, it may play a role in nach. PITX2 can be bound by some other his antibody specifically recognizes isoform	
right signaling. It controls cell prolife embryonic development, PITX2 is inv the proper localization of asymmetric proteins, and are part of a much large PTX2C.	ration in a tissue-specific manner volved in the expansion of muscle corgans such as the heart and stor r atrial transcriptional complex. T	f developmental programs, including left- and is involved in morphogenesis. During progenitors. In addition, it may play a role in nach. PITX2 can be bound by some other his antibody specifically recognizes isoform

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 67201-1-1g (PITX2 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated Beta Actin Monoclonal antibody (HRP-66009) as loading control.

HEK-293 cells were subjected to SDS PAGE followed by western blot with 67201-1-1g (PITX2 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
