

For Research Use Only

CCDC6 Monoclonal antibody

Catalog Number: 67637-1-Ig

Basic Information

Catalog Number: 67637-1-Ig	GenBank Accession Number: BC036757	Purification Method: Protein A purification
Size: 150ul , Concentration: 900 ug/ml by Nanodrop and 500 ug/ml by Bradford method using BSA as the standard;	GeneID (NCBI): 8030	CloneNo.: 1D6A8
Source: Mouse	UNIPROT ID: Q16204	Recommended Dilutions: WB 1:5000-1:50000 IF/ICC 1:200-1:800
Isotype: IgG1	Full Name: coiled-coil domain containing 6	
Immunogen Catalog Number: AG6952	Calculated MW: 474 aa, 53 kDa	
	Observed MW: 65 kDa	

Applications

Tested Applications: WB, IF/ICC, ELISA	Positive Controls:
Species Specificity: Human, mouse, rat	WB : MCF-7 cells, A549 cells, U2OS cells, LNCaP cells, HeLa cells, HepG2 cells, K-562 cells, Jurkat cells, HSC-T6 cells, NIH/3T3 cells
	IF/ICC : MCF-7 cells,

Background Information

CCDC6 (Coiled-coil domain-containing protein 6) is also named as Protein H4, D10S170 and TST1. CCDC6, was initially isolated as part of a tumorigenic DNA originated by the fusion of CCDC6 with the tyrosine kinase of RET receptor. CCDC6 has been considered as an accidental partner of the RET protooncogene, providing the promoter and the first 101 aa necessary for the constitutive activation of the oncogenic Tyrosine Kinase (TK) RET in thyroid cells. The 65 kDa product of CCDC6 has a nuclear transfer sequence with no transmembrane domains and is predicted to locate in both the nucleus and the cytoplasm (PMID: 29044514). The CCDC6 is a phosphoprotein, predicted target of several S/T kinases which can modulate the protein stability and the intracellular shuttling into the nucleus upon different cellular signals mediated by ERK1/2, ATM and CDK1/2. CCDC6 is involved in cellular response to DNA damage mediated by ATM, with the final result of promoting cellular apoptosis. CCDC6 depleted cells are considered defective of DNA repair checkpoint and proceed faster than the control cells in the cell cycle upon induced DNA damage (PMID: 22655027).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 67637-1-Ig (CCDC6 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control.

Immunofluorescent analysis of (-20°C Ethanol) fixed MCF-7 cells using CCDC6 antibody (67637-1-Ig, Clone: 1D6A8) at dilution of 1:400 and CoraLite®488-Conjugated Goat Anti-Mouse IgG(H+L), CL594-Phalloidin (red).
