## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 67806-1-lg (PKMYT1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control.

Immunohistochemical analysis of paraffinembedded human colon cancer tissue slide using 67806-1-Ig (PKMYT 1 antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). WB result of PKMYT1 antibody (67806-1-1g; 1:2000; incubated at room temperature for 1.5 hours) with sh-Control and sh-PKMYT1 transfected MCF-7 cells.
